				100						100	
Introduction			Windows			Navigation			File		
	that are set by default	ns the keyboard shortcuts when you use the Visual ettings. To set the Visual Basic	Navigation Bar	CTRL + F2	Moves the cursor to the drop-down bar located at the top of the Code Editor. (Window.MoveToNavigationBar)	Go to Definition	F12 or SHIFT + F2	Moves to the declaration for the selected symbol. (Edit.GoToDefinition)	New Project	CTRL + N or CTRL + SHIFT + N	Displays the New Project dialog box. (File.NewProject)
	Development Settings Options. In the Option	, on the Tools menu, click ns dialog box, select Show	Object Browser	F2	Displays the Object Browser . (View.ObjectBrowser)	Navigate Backward	CTRL + SHIFT + F2 or CTRL + MINUS SIGN (-)	Moves to the previously browsed line of code. (View.NavigateBackward)	Open Project	CTRL + O or CTRL + SHIFT + O	Displays the Open Project dialog box. (File.OpenProject)
	Keyboard . Click the Vi	under Environment , click isual Basic 6 keyboard mapping own list and then click OK .	Properties Window	F4	Displays the Properties window for the currently selected item. (View.PropertiesWindow)	Navigate Forward	CTRL + SHIFT + MINUS SIGN (-)	Moves to the next browsed line of code. (View.NavigateForward)	Add New Item Add Existing Item	CTRL + SHIFT + A CTRL + D	Displays the Add New Item dialog box. (<i>Project.AddNewItem</i>) Displays the Add Existing Item
	yourself. To do so, on t	lividual command shortcuts the Tools menu, click Options . box, select Show all settings ,	Solution Explorer	CTRL + R	Displays Solution Explorer . (View.SolutionExplorer)	Previous Method or Type	CTRL + UP ARROW or CTRL + PAGE UP	Moves to the previous method or type in the document. (Edit.PreviousMethod)		CIRE + D	dialog box. (Project.AddExistingItem)
	and then, under Envir edit a shortcut, locate	onment, click Keyboard. To the command name in the	View Server Explorer	CTRL + ALT + S	Displays Server Explorer . (View.ServerExplorer)	Next Method or Type	CTRL + DOWN ARROW or CTRL +	Moves to the next method or type in the document (Edit.NextMethod)	Snippets		Manager on the Tools menu to find the
		ssign it a shortcut key. In this the commands described are es.	Show Data Sources	SHIFT + ALT + D	Displays the Data Sources window. (Data.ShowDataSources)	Previous and Next	PAGE DOWN CTRL + LEFT ARROW	Moves the insertion point left or		listed below. You can also cu the Shortcut tag of the snipp	sert Snippet from Shortcut" commands istomize snippet shortcuts by editing pet XML files. The Code Snippet Editor e application that you can download to
		commands, along with their	Toolbox	CTRL + ALT + X	Displays the Toolbox. (View.Toolbox)	Word	and CTRL + RIGHT ARROW	right one word, respectively. (Edit.WordPrevious and Edit.WordNext)			microsoft.com/fwlink/?LinkId=75013 for
		nd detailed descriptions, see om/fwlink/?LinkId=74687.	Error List	CTRL + ∖, E	Displays the Error List. (View.ErrorList)	IDE Navigator	CTRL + TAB	Displays the IDE Navigator, with the first document window	Insert Snippet	Type "?" and press TAB	Displays the Code Snippet Picker in
Editing			Close Tool Window	SHIFT + ESC	Closes the current tool window. (Window.CloseToolWindow)			selected. The IDE Navigator functions similarly to the Windows Navigator (ALT + SHIFT + TAB),	insert simppet	Type I and piess in B	the Code Editor. The selected code snippet is then inserted at the cursor position. (Edit.InsertSnippet)
Toggle All Outlining	CTRL + M, CTRL + L	Toggles all existing regions between collapsed and expanded states. (Edit.ToggleAllOutlining)	Close Document Window	CTRL + F4	Closes the current tab. (Window.CloseDocumentWindow)			only it is for files and tool windows within Visual Studio. (Window. NextDocumentWindowNav)	Insert Snippet from Shortcut	Type the snippet shortcut and press TAB	Inserts the expanded code snippet. (Edit.InvokeSnippetFromShortcut)
Toggle Outlining for Current Region	CTRL + M, CTRL + M	Toggles the current region between collapsed and expanded	Debugging			View All Open	CTRL + ALT + DOWN	Displays a pop-up listing of all	Insert Property Snippet	Type "property" and	Inserts a Property snippet. (Example of
Current Region		states. (Edit.ToggleOutliningExpansion)	Start Debugging	F5	Starts the application in the debugger. When in Break mode,	Documents	ARROW	open documents. (Window.ShowEzMDIFileList)		press TAB	Edit.InvokeSnippetFromShortcut)
Comment and Uncomment	CTRL + K, CTRL + C and CTRL + K, CTRL + U	Inserts and removes, respectively, the apostrophe (') at the beginning of the current line or every			invoking this command runs the application until the next breakpoint. (<i>Debug.Start</i>)	View Code	F7	Displays the selected item in Code view of the Editor. (View.ViewCode)	List Snippet Shortcuts	Type a snippet shortcut prefix, type "?", and press TAB	Displays the Code Snippet Shortcut Picker. The shortcut in the list, which most closely matches the prefix, is
Undo	CTRL + Z	selected line. (Edit.CommentSelection and Edit.UncommentSelection) Undoes the last action. (Edit.Undo)	Start Without Debugging	CTRL + F5	Starts the application without invoking the debugger. Use this exclusively rather than F5 for Web	View Designer	SHIFT + F7	Displays the selected item in Design view of the Editor. (View.ViewDesigner)	List Snippet	CTRL + SPACE	Invokes an IntelliSense completion list for the currently selected snippet
Redo	CTRL + SHIFT + Z	Redoes the last action. (Edit.Redo)			site debugging. (Debug.StartWithoutDebugging)	HTML Designer	SHIFT + F7	Switches between Source view and	Replacements		replacement.
Cut Line	CTRL + Y	Cuts the current line of code. (Edit.LineCut)	Step Into	F8 or F11	Executes code one statement at a time, following execution into	View Document	CTRL + ALT + T	Design view for the current HTML. (View.ViewMarkup and View.ViewDesigner) Displays the Document Outline	Escape Replacement Selection	ESC	Deselects the current text. A second ESC deselects the replacement. Can be useful when you want to type at
Insert Blank Line	CTRL + ENTER and CTRL + SHIFT + ENTER	Inserts a blank line above and below the cursor position, respectively. (Edit.LineOpenAbove and	Step Out	CTRL + SHIFT + F8 or SHIFT + F11	method calls. (Debug. StepInto) Executes the remaining lines of the method in which the current	Outline		window. Particularly useful in the Form Designer and HTML Designer. (View.DocumentOutline)			the end of a replacement without extending its bounds.
Select Word	CTRL + SHIFT + W	Edit.LineOpenBelow) Selects the word containing, or to	Stop Over	SHIFT + F8 or F10	execution point is located.
